

Premium Rose Sexy 2007

This gorgeous rosé wine is produced by mixing several red grape varieties (Syrah, Sangiovese, Montepulciano) through the so-called “saignée” method which enables a few hours of a direct contact of the grape juice with the grape skins, resulting in a an intense red color of the wine, best described as a “deep ruby” rose. The wine has an intense rose color and aromas of red fruits, especially raspberries and strawberries which are dominant and complemented with discrete spicy and minty notes. Medium-bodied, with pleasant alcohol content and with expressive freshness and harmony.

Recommended as an aperitif suitable for consumption any time of the day, chilled at 8-10°C.

Bottled: July, 2008
